9.3 Notification for reduced timelines for approval for CTE

The timelines for Consent to Establish (CTE) & Consent to Operate (CTO) approvals for the various categories of Industries have been notified. The timeline for the approvals is 30 days, 60 days and 90 days for the Green, Amber and Red Category of industries.

The order also stipulates that the Inspection Reports and Approval Letters are available online for the applicants which can be verified through the online portal itself.
9.4 Notification for exemption of CTE / CTO for white category industry

UEPPCB has notified the list of industries under the various categories - Red, Amber, Green and White. The detailed notification clearly lists down the specific industries that fall under each of the categories.
9.5 Differentiation of compliance inspection requirements based on industry pollution categorization

UEPPCB has notified the timeframe for the inspections for each of the categories of industries - Red, Amber, Green. The incidence of Inspections for the various categories of industries are:

<table>
<thead>
<tr>
<th>Incidence of Inspection</th>
<th>Red</th>
<th>Amber</th>
<th>Green</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Once in 3 months</td>
<td>Once in 6 months</td>
<td>Once in 12 months</td>
</tr>
</tbody>
</table>

Specifically for Green Category industries, routine departmental inspections can be waived off, if the industry provides self-certified documents. The Board has also ensured that for consecutive inspections of any industry, same official is not allotted thereby ensuring that a different inspector is allotted the inspections.
9.6 Third Party Audit Certification

UEPPCB has allowed Third Party Certification for the environmental compliance of medium risk category industries. Any industry falling under the medium risk category can avail of the Third Party Audit Certification instead of routine departmental inspections and any agency / institute / body as empanelled by UEPPCB have been authorised for the same.

The format for the application for opting for Third Party Certification is available on the portal of UEPPCB.

- Usually inspection team comprising of one or more officers are authorised to carry out inspection under the provisions of various environmental legislations.
  - On the entry of premises, the team serves a notice of entry & inspection to the responsible person / occupier of the premises
  - During inspection, in the presence of the responsible person / occupier of the premises the team carries out inspection, which includes, verification of:
    - Operation of plant(s), product(s) being manufactured with quantity
    - Product(s) being manufactured with quantity
    - Status of operation of Environment Management System comprising of control measures for liquid, gaseous and solid wastes
    - Generation of liquid, gaseous and solid wastes & their disposals
    - Maintenance of records in the form of logbooks etc.
    - Availability of various utilities and consumption of resources viz. water, fuels electricity etc.
    - Number of outlets provided for disposal of liquid effluent and compliance of thereof vis-à-vis conditions in the consent granted
    - Number of emission stacks / vents / boilers etc. and compliance of thereof vis-à-vis conditions in the consent granted
    - Compliance of consent conditions with respect to Water Pollution, Air Pollution and Hazardous Waste Generation
  - During the inspection and verification of the industrial unit the team may or may not collect sample(s) of waste water, gaseous emission(s) and hazardous waste(s), depending upon the environmental circumstances during the visit
  - At the end, the monitoring team issues written instructions to the industry for the non-compliances observed, if any, and they are brought to their notice with required corrective measures
  - Team also lists suggestions (based on their earlier experience) to take additional measures so as to reduce pollution load at source or to improve treatability
  - A check list of the documents, which inspection team might verify during its visit is also appended with procedure and are as under:
    - Water Consumption Data
    - Production details
    - Air Pollution Control Measures
    - EMS Records and Logbooks, if any
